

Advances in Modelling. Series A. General Mathematics

2014

Vol. 51, n°1

- Computing the special determinants of containing the second derivative.
Liang, J. (China) 1
- Error elimination based on error set.
Zhou, J.G.; Ye, Q.X.; Guo, K.Z.; Xiong, H.O. (China) 13
- The solution of the more general traveling salesman problem.
Feng, C.; Liang, J. (China) 27
- Algebras of the special determinants.
Liang, J. (China) 41
- Identification of monoparametric families of a remarkable complex bol algebras class, generated by the symmetric space $g_2/so(4)$.
Al-Houjairi, M.; El-Eter, B. (Lebanon) 59
- The construction of the sensitivity functionals in the bolts's problem for multivariate dynamic systems described by integro-differential equations with delay time.
Rouban, A.I. (Russia) 80

2013

Vol. 50, n°1

- A compound poisson dam with release rule proportional to its content and wiener process content.
Zainal,M.; Al-Eideh, B.M.; Marafie, A. (Kuwait)..... 1
- Computing the special determinants.
Liang, J. (P.R. China).....11
- Some new measures of directed divergence and generalized directed divergence.
Ray, A.; Majumder, S.K. (India)..... 25
- Renyi's and Fermi-dirac entropic regularization method for solving min-max problems and its related applications.
Gosh, G.; Mazumder, S.K. (India).....36
- Study on decomposition transformation of error System structure.
Liao, L.P.; Guo, K.Z.; Yao, L.X. (P.R. China).....50
- Study of similarity transformation of error system structure.
Liao, L.P.; Guo, K.Z.; Yao, L.X. (P.R. China))..... 67

- A review of error-eliminating theory.
Zhou, J.G.; Chen, H.Z.; Guo, K.Z.; Ye, S.S. (China)..... 83

Vol. 50, n°2

- A new hybrid WC-FR conjugate gradient method with relaxed conjugacy condition.
Al-Bayati, A.Y.; Al-Kawaz, R.Z. (Iraq)..... 1
- Study for solution of the error-eliminating programming model with containing-type error matrix equation.
Min, X.; Guo, K. (China P.R.).....30
- Discontinuity of convergence of solutions for a class of linear singular switched systems with time delay.
Xie, X.S. (P.R.China)..... 42
- On inverse quadratic programming problems.
Jain, S.; Arya, N. (India).....55
- Stability of triangular equilibrium points in elliptical restricted three body problem under effects of oblateness primaries.
Narayan, A.; Ramesh Kumar, C. (India).....72
- One-element second-kind-three indeterminate error matrix equation.
Liu, H.; Guo, K.
(P.R.China)..... 87
- Optimization problems for a newparametric measure of information in dual spsceOne-element second-kind-three indeterminate error matrix equation.
Verma, R.K. (India).....96

2012

Vol. 49, n°1

- *On Shunkov's groups with involutions-*
Senashov, V. I. (Russia).....1
- *A fitting scattered data method based on the criterion of geomètric distance.*
Yang, G.; Liu, D.; Wang, X. (P.R. China-USA)..15
- *The uniqueness of limit cycle in a class for quantic polynomial system.*
Liang, J. (P.R. China).....28
- *Study on error system structure analysis and substitution transformation.*
Liao, L. P.; Guo, K. Z.; Yao, L. X.(P.R.Chi.....38

Vol. 49, n°2

- *The interpolation formula of hermitic in two variables.*
Liang, J. (P.R. China).....1
- *Speed optimization of vedic multiplier.*

Pradhan. M.; Panda, R.. (India).....	21
- <i>On the average number of real zeros of a random trigonometric polynomial.</i>	
Nayak, B. (India).....	36

2011

Vol. 48, n° 1

–	<i>A simplification of addition for several fraction forms.</i>	
J. Liang (China).....		1
–	<i>A continuous hybrid method for solving parabolic partial differential equations (PDE).</i>	
O.A. Akinfenwa; S.N. Jator; N.M. Yao (China-USA).....		17
–	<i>Structure of almost layer-finite groups.</i>	
V.I. Senashov (Russia).....		28
–	<i>The existence of limit cycles in class II of quadratic differential systems.</i>	
J. Liang (China).		39

Vol. 48, n° 2

–	<i>A modified three-term conjugate gradient method.</i>	
A.Y. Al-Bayati; B.A. Hassan (Iraq).....		1
–	<i>A survey on the periodic hyperbolic functions.</i>	
M. Bernard; N. Moubayed; M. Al-Houjairi (Lebanon).....		15
–	<i>Special determinants and their computations.</i>	
J. Liang (China).....		27
–	<i>The uniqueness of interpolation polynomial for two variables.</i>	
J. Liang (China).....		42

2010

Vol. 47, n° 1

- “Parameterised conjugate gradient methods with four and five parameters”.
A. Y. Al-Bayati; B. A. Hassan; H. I. Ahmed(Iraq).....1
- “Fuzzy multi-element error-matrix and its operation”.
H. Liu; K. Guo (China)..... 21
- “Employing substitution connectives of error-elimination logic in decision making of social system”.
S. Liu; H. D. Wan; K. Guo (China-USA).....33

Vol. 47, n° 2

- “Some estimators of population mean in two-occasion rotation patterns”.
G. N. Singh; S. Prasad (India).....1
- “The optimisation of digital controllers for fuzzy systems design”.
Y. P. Kondratenko; T. A. Altameem; E. Y. M. Al Zu’bi (Ukraine –Saudi Arabia).....19
- “Neural networks algorithms based on nonlinear unconstrained optimization”.
A. Y. Al Bayati; N. A. Sulaiman; G. W. Sadiq (Iraq)30

2009

Vol. 46, n° 1

- “An efficient and more reliable second order load flow solution method”.
H. A. Kubba (Iraq)1
- “Linear discrete system design using marden table”.
S. N. Sivanandam; S. Rajan (India).....19
- “A non convex descent method for non-linear optimization problem”.

I. Subhi Latif (Iraq).....	28
– “The error bounds of approximation solution of spline interpolating the lacunary data (0, 2, 3, 4) with degree seven”.	
A. Y. Al-Bayati; W. H. Sharif; M. A. Shallal (Iraq-Qatar)	44
– “Computational optimisation via tournament genetic algorithm”.	
S. Kundu; A. K. Bhunia (India).....	57
– “Stability motion of non relativistic free particles”.	
M. A. Al - Hazemy (Saudi Arabia).....	71
– “Fuzzy error - matrix equation”.	
H. Liu; K. Guo (China).....	81

Vol. 46, n° 2

– “Multiobjective quadratic program with fuzzy programming approach”.	
S. Jain; K. Iachhwani (India).....	1
– “An efficient numerical technique for solving fredholm second kind linear integral equations”.	
A. Al-Dmour; M. Hasan; A. Musa; F. Fraij (Jordan).....	11
– “Fault-tolerant field on m-value information space”.	
G. Yang; S. Wang; X. Zhuang (China)	20
– “Techniques in biomimetics pattern recognition and their applications”.	
G. Yang; S. Wang (China).....	36
– “Encryption through block substitution through sequential position in set of distinct blocks”.	
P. Paul; S. Dutta; A. K. Bhattacharjee (India)	54
– “Modelling of fourier elimination technique for multi-objective linear programming problem”.	
S. Jain (India).....	70

- “A modified algorithm for broyden family”.
- T. H. M. Abou-El-Enien (Egypt).....79

2008

Vol. 45, n° 1

- “Application of collocation perturbed Fibonacci method to ordinary differential equations”.
- J. O. Omolehin (Nigeria).....1
- “A novel parallel boolean minimizer using gray code”.
- S. Verma; K. Permar (India).....11
- “A dual approach method for solving a class of Bi-level linear programming system”.
- Liping Wang; Jiping Ye; Zongping Wan; Changming Ji (China).....27
- “Existence and uniqueness of optimal control for linear neutral Volterra integro-differential systems”.
- V. A. Iheagwam (Nigeria).....36
- “Identification of diagonal kernels of non linear quadratic models using non gaussian input signals”.
- J. Antari; A. Zeroual (Morocco).....56
- “Microwave propagation through sand and dust clouds”.
- S. O. Bashir (Sudan)..... 71

Vol. 45, n° 2

- “The limit cycle in a class of quintic polynomial system”.
- J. Liang (China).....1
- “Enhanced lagrangian relaxation solution to the generation scheduling problem”.

F. Benhamida (Algeria).....	12
– “On the tau method for a class of non-overdetermined second order differential equations”.	
R. B. Adeniyi; A. I. M. Aliyu (Nigeria).....	27
– “Adaptive control of nonholonomic systems with nonlinear parameters”.	
F. Yuan; F. Gao; C. Gao (China).....	45
– “Error bound for 2-stage multiderivative explicit Runge-Kutta methods”	
M. A. Akanbi; S. A. Okunuga; A. B. Sofoluwe (Nigeria).....	57

2007

Vol. 44, n° 1

– “Fuzzy based optimization and analysis of building performance under uncertainty”.	
M.F. Qureshi; R.K. Gabel; Varsha Singh; N.P. Dewangan (India).....	1
– “A new method of establishing correlation function in N-Dimension matter element extension set”.	
Yang Guowei; Lai Yixin (China).....	18
– “Simulation and microcontroller implementation of an integrated modulo $(2n \pm 1)$ residue adder”.	
R.A. Mishra; C. Bose; S.K. Sanyal (India).....	35
– “A novel symmetric key cryptographic algorithm using advanced polynomial transformation (APT)”.	
G. Sudha Sadhasivam; C.K. Gokulnath; V. Mathangi (India).....	47

– “Minimum control energy for infinite delay systems”.

I. Davies (Nigeria).....58

– “The interpolation formula of two variables”.

J. Liang (China).....69

– “On intuitionistic fuzzy ideals in semirings”.

A. Tamilarasi (India).....86

Vol. 44, n° 2

– “An efficient L-Stable method with exponential basis functions for stiff differential equations”.

J.O. Fatokun; P. Onumanyi (Nigeria).....1

– “Boundary control problem with non-linear state equation with an infinite number of variables”.

S.A. El-Zahaby; G.E. Mostafa (Egypt).....20

– “Asymptotic behaviour of normal solutions for linear singular systems with time delay”.

X. Xie (China).....35

– “Method for global minimax optimisation in continuous space”.

A.I. Rouban (Russia).....46

– “Two-dimensional hyperbolic grid generation”.

U.C. Dinçgez; M.H. Aksel; R. Çete (Turkey).....66

– “A modified real coded hierarchical genetic algorithm for optimization of continuous functions”.

P. Pal; A.K. Bhunia (India).....86
